

Science 100 Statement of Interest Instructions

In 500 words or less, explain why you would like to be a part of Science 100.

Some possible topics to consider:

- Why is Science 100 right for you?
- What attracts you to science?
- Are there particular areas of science you really like? Dislike? Why?
- If you could have any job, what would you do?
- What sorts of things do you consider a challenge? Do you like challenges?
- What do you see yourself doing in future?
- Do you prefer to work on projects as part of a group or individually?

These are only a few of many possibilities that could be discussed. Tell us what you think is most important and relevant. Feel free to be creative. The goal of the Statement of Interest is to convince the reader that you want to be a part of Science 100.

Technical:

- Submission is through the secure online form available through the Science 100 information pages.
- You will need your CCID to access this form.
- You will need the name of your Referee to complete the form.
- You should write the statement using some type of word processing software and then simply copy and paste your text into the space provided. The system will time out after 1 hour, so composing directly on the form is not recommended. You can not save work on the form and return to it later.
- The space available is limited to 500 words, and is formatted for plain text only, so don't worry about font choice or formatting. All applications will look the same to the reviewers. We are interested in what you have to say, rather than appearance.
- After successful submission, you will receive an email (at your U of A email account) confirming receipt of your statement.
